Urology

More about our team of specialists

**Associate Professor Chris Kimber, Head of Paediatric Urology and Head of Paediatric Surgery**

Dr Kimber graduated from Monash University's Medical Faculty prior to undertaking Paediatric Surgery training in Australia and United Kingdom. He is currently Head of Paediatric Urology and Head of Paediatric Surgery for Monash Children's Hospital, Monash Health. He has also been appointed state Clinical lead at The Department of Human Services.

Dr Kimber has made extensive contributions to training and development of paediatric surgery and paediatric urology in developing nations of South-East Asia. Regular visits to Vietnam and recently Cambodia have established strong regional links which see an exchange of surgical staff for education and training.

In addition to his role at Monash, Dr Kimber also consults at The Children's Surgery at Cabrini Hospital and makes regular visits to regional Victoria and Darwin to provide an outreach service.

**Dr Nathalie Webb**

Dr Webb obtained her medical degree from University of Sydney prior to undertaking surgical training in first General Surgery, then Urology. Completing urological training in NSW, she then undertook subspeciality training in Paediatric Urology at Melbourne's Royal Children's Hospital and subsequently London's Great Ormond Street Hospital for Children.

Returning as Consultant Paediatric Urologist to Sydney Children's Hospital in 2006, she established a public outpatients clinic for this specialty, and strengthened multidisciplinary services for perinatal urology and management of complex urogenital disorders. She established a state-wide quaternary service to manage urinary tract stone disease in children and was instrumental in creating a sub-specialty training position for Paediatric Urology within the new Sydney Children's Hospitals' Network.

Dr Webb relocated to Melbourne in 2012, to take up a full-time role as Paediatric Urologist for Monash Children's Hospital, consulting to Monash Foetal Diagnostic Unit and Monash Newborn.
Dr Rob Coleman

Dr Coleman received his undergraduate degree at the University of Queensland and completed Urology training in Queensland. He then undertook subspecialty training in Paediatric Urology at Birmingham Children's Hospital, UK.

Following completion of subspecialty training, he continued at that centre as Specialist Paediatric Urologist from 2013, developing the Urinary Tract Stone Service. He returned to Australia, joining Monash Children's Hospital in September 2015, where he will develop and lead an Adolescent and Transition Urology service and consult to the Spinal Anomalies Service.

Dr Coleman is a Fellow of the Royal Australasian College of Surgeons and a member of the Urological Society of Australia and New Zealand. He is the first Australian to attain status of Fellow of the European Academy of Paediatric Urology.
